2022 IEEE Taxonomy

Version 1.02

Created by
The Institute of
Electrical and
Electronics Engineers
(IEEE)

IEEE Taxonomy: A Subset Hierarchical Display of IEEE Thesaurus Terms

The IEEE Taxonomy comprises the first three hierarchical 'levels' under each term-family (or branch) that is formed from the top-most terms of the IEEE Thesaurus. In this document these term-families are arranged alphabetically and denoted by boldface type. Each term family's hierarchy goes to no more than three sublevels, denoted by indents (in groups of four dots) preceding the next level terms. A term can appear in more than one hierarchical branch and can appear more than once in any particular hierarchy. The IEEE Taxonomy is defined in this way so that it is always a subset of the 2022 IEEE Thesaurus.

Aerospace and electronic systems	Airborne radar
	Bistatic radar
Aerospace control	Cognitive radar
Air traffic control	Doppler radar
Attitude control	Ground penetrating radar
Ground support	High frequency radar
Aerospace engineering	Laser radar
Aerospace biophysics	Meteorological radar
Aerospace electronics	Millimeter wave radar
Aerospace safety	Multistatic radar
Air safety	MIMO radar
Aerospace simulation	Passive radar
Aerospace testing	Quantum radar
Wind tunnels	Radar applications
Artificial satellites	Radar countermeasures
Earth Observing System	Radar detection
Low earth orbit satellites	Radar imaging
Military satellites	Radar measurements
Space stations	Radar polarimetry
Space technology	Radar remote sensing
Payloads	Radar tracking
Space debris	Radar clutter
Space exploration	Radar cross-sections
Aerospace materials	Radar equipment
Aerospace components	Radar theory
Aircraft manufacture	Spaceborne radar
Aircraft navigation	Spread spectrum radar
Aircraft propulsion	Synthetic aperture radar
Propellers	Inverse synthetic aperture radar
Command and control systems	Polarimetric synthetic aperture radar
Electronic warfare	Ultra wideband radar
Electronic countermeasures	Sensor systems
Jamming	Activity recognition
Radar countermeasures	Gunshot detection systems
Military equipment	Sonar
Military aircraft	Sonar applications
Payloads	Sonar detection
Military satellites	Sonar measurements
Military vehicles	Sonar equipment
Weapons	Synthetic aperture sonar
Guns	Telemetry
Missiles	Biomedical telemetry
Nuclear weapons	
Projectiles	
Radar	

Antennas and propagation	Physical theory of diffraction
A . (X-ray diffraction
Antennas	Electromagnetic propagation in absorbing
Antenna accessories	media
Radomes	Electromagnetic reflection
Antenna arrays	Optical reflection
Adaptive arrays	Microwave propagation
Butler matrices	Millimeter wave propagation
Linear antenna arrays	Optical propagation
Log periodic antennas	Optical surface waves
Microstrip antenna arraysMicrowave antenna arrays	Optical waveguides
Phased arrays	Propagation constant
Planar arrays	Propagation lossesRadio propagation
Antenna radiation patterns	Radio propagation
Near-field radiation pattern	NVIS
Antenna theory	Submillimeter wave propagation
Frequency selective surfaces	UHF propagation
Apertures	Radio astronomy
Aperture antennas	Radio astronomy
Aperture coupled antennas	Broadcast technology
Broadband antennas	Dioudoust teelinology
Ultra wideband antennas	Broadcasting
Vivaldi antennas	Digital audio broadcasting
Dielectric resonator antennas	Digital audio players
Dipole antennas	Digital Radio Mondiale
Directional antennas	Digital multimedia broadcasting
Directive antennas	Digital video broadcasting
Feeds	Motion pictures
Antenna feeds	NVIS
Fractal antennas	Radio broadcasting
Helical antennas	Frequency modulation
Horn antennas	Radio networks
Leaky wave antennas	Satellite broadcasting
Loaded antennas	Web TV
Log-periodic dipole antennas	
Microstrip antennas	Circuits and systems
Microwave antennas	
Mobile antennas	Circuits
Multifrequency antennas	Active circuits
Omnidirectional antennas	Active inductors
Patch antennas	Gyrators
Radar antennas	Operational amplifiers
Receiving antennas	Adders
Rectennas	Analog circuits
Reflector antennas	Analog integrated circuits
Satellite antennas	Analog processing circuits
Slot antennas	Application specific integrated circuits
Steerable antennas	System-on-chip
Transmission line antennas	Asynchronous circuits
Transmitting antennas	Bipolar transistor circuits
UHF antennas	BiCMOS integrated circuits
Yagi-Uda antennas	Bipolar integrated circuits
Electromagnetic propagation	Bistable circuits
Electromagnetic diffraction	Latches
Optical diffraction	Bridge circuits

Charge numps	Padiofrequency integrated circuits
Charge pumpsCircuit analysis	Radiofrequency integrated circuitsSubmillimeter wave integrated circuits
Circuit analysis computing	Superconducting integrated circuits
Coupled mode analysis	Thick film circuits
Nonlinear network analysis	Thin film circuits
Circuit faults	Three-dimensional integrated circuits
Electrical fault detection	Through-silicon vias
Circuit noise	UHF integrated circuits
Thermal noise	Ultra large scale integration
Circuit simulation	Very high speed integrated circuits
Circuit synthesis	Very large scale integration
High level synthesis	Wafer scale integration
Integrated circuit synthesis	Isolators
Coprocessors	Large scale integration
Counting circuits	Ultra large scale integration
Coupling circuits	Very large scale integration
Digital circuits	Wafer scale integration
Circuit topology	Linear circuits
Digital integrated circuits	Logic arrays
Digital signal processors	Programmable logic arrays
Distributed parameter circuits	Logic circuits
Driver circuits	Combinational circuits
Electronic circuits	Logic arrays
Breadboard	Programmable logic arrays
Central Processing Unit	Superconducting logic circuits
Multivibrators	Magnetic circuits
Stripboard circuit	Microprocessors
Equivalent circuits	Automatic logic units
Feedback	Biomimetics
Feedback circuits	Coprocessors
Negative feedback	Microcontrollers
Neurofeedback	Microprocessor chips
Hybrid integrated circuits	Vector processors
Integrated circuits	Microwave circuits
Analog integrated circuits	Millimeter wave circuits
Analog-digital integrated circuits	Millimeter wave integrated circuits
Application specific integrated circuits	Millimeter wave integrated circuits
CMOS integrated circuits	MIMICs
Coprocessors	Monolithic integrated circuits
Current-mode circuits	MIMICs
Digital integrated circuits	MMICs
FET integrated circuits	MOSFET circuits
Field programmable gate arrays	CMOSFET circuits
Hybrid integrated circuits	MOS integrated circuits
Integrated circuit interconnections	Power MOSFET
Integrated circuit modeling	Multiplying circuits
Integrated circuit noise	Neural circuits
Integrated circuit synthesis	Nonlinear circuits
Large scale integration	Nonlinear network analysis
MESFET integrated circuits	Passive circuits
Microprocessors	Phase shifters
Microwave integrated circuits	Phase transformers
Millimeter wave integrated circuits	Power dissipation
Monolithic integrated circuits	Power integrated circuits
Photonic integrated circuits	Printed circuits
Power integrated circuits	Flexible printed circuits
<u> </u>	• • • • • • • • • • • • • • • • • • • •

Memory modules	Anisotropic
Surface mount technology	Bragg gratings
Programmable circuits	Channel bank filters
Field programmable analog arrays	Comb filters
Programmable logic arrays	Digital filters
Programmable logic devices	Equalizers
Programmable logic arrays	Filtering theory
Programmable logic devices	Gabor filters
Pulse circuits	Harmonic filters
Flip-flops	IIR filters
Quantum circuit	Kalman filters
Radiation detector circuits	Low-pass filters
Rail to rail operation	Matched filters
•	Microstrip filters
Rail to rail amplifiers	Nonlinear filters
Rail to rail inputs	
Rail to rail outputs	Notch filters
Rectifiers	Particle filters
RLC circuits	Power filters
Sampled data circuits	Resonator filters
Sequential circuits	Spatial filters
Silicon-on-insulator	Superconducting filters
Silicon on sapphire	Transversal filters
Submillimeter wave circuits	Information filtering
Submillimeter wave integrated circuits	Information filters
Summing circuits	Recommender systems
Switched circuits	Integrated circuit technology
Switched capacitor circuits	Beyond CMOS
Switching circuits	CMOS technology
Choppers (circuits)	CMOS process
Logic circuits	Silicon on sapphire
Switching converters	Moore's Law
Zero current switching	Logic devices
Zero voltage switching	Logic gates
Thick film circuits	Programmable logic devices
Thin film circuits	Oscillators
Thyristor circuits	Digital-controlled oscillators
Time varying circuits	Injection-locked oscillators
Trigger circuits	Local oscillators
	B 41 111 4
UHF circuits	Microwave oscillatorsPhase noise
UHF integrated circuits	
UHF integrated circuits	Ring oscillators
Ultra large scale integration	Voltage-controlled oscillators
Very large scale integration	Single electron devices
Neuromorphics	Single electron memory
VHF circuits	Hetero-nanocrystal memory
Voltage multipliers	Single electron transistors
Capacitors	Tunable circuits and devices
Diodes	RLC circuits
Wafer scale integration	Tuned circuits
Contacts	
Brushes	Communications technology
Contact resistance	
Ohmic contacts	Communication equipment
Filtering	Auditory displays
Filters	Codecs
Active filters	Speech codecs
	1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1

Video codecs	Telemedicine
Modems	Broadband communication
On board unit	B-ISDN
Optical communication equipment	Broadband amplifiers
Optical transmitters	Communication networks
Radio communication equipment	Central office
Base stations	Cyberspace
Ham radios	Industrial communication
Land mobile radio equipment	Maritime communications
Radio transceivers	Radio access technologies
Transponders	Relay networks (telecommunication)
Receivers	Telecommunication network
Optical receivers	performance
RAKE receivers	Virtual links
Receiving antennas	
	Communication system controlTelecommunication control
Repeaters	
Speech codecs	Communication system security
Telephone equipment	Denial-of-service attack
Cellular phones	Impersonation attacks
Landline	Quantum key distribution
Telephone sets	Radio communication countermeasures
Vocoders	Communication system signaling
Transceivers	Received signal strength indicator
Radio transceivers	Communication system software
Transmitters	Streaming media
Auxiliary transmitters	Communication system traffic
Diversity methods	Communication system traffic control
Neurotransmitters	Computer networks
Optical transmitters	Ad hoc networks
Radio transmitters	Computer network management
Transmitting antennas	Content distribution networks
Transponders	Cyberspace
TV equipment	Diffserv networks
Large screen displays	Domain Name System
TV receivers	Ethernet
Video codecs	Heterogeneous networks
Video equipment	Internet
Optical projectors	Intserv networks
Video codecs	IP networks
Videos	Metropolitan area networks
Vocoders	Multiprocessor interconnection networks
Communication switching	Network function virtualization
Code division multiplexing	Network servers
Electronic switching systems	Next generation networking
Frame relay	Overlay networks
Handover	Peer-to-peer computing
Multiprotocol label switching	Software defined networking
Packet switching	
· · · · · · · · · · · · · · · · · · ·	Storage area networks
Burst switching	Token networks Unicast
Frame relay	
Multiprotocol label switching	Virtual private networks
Packet loss	Wide area networks
Communication systems	Wireless access points
ARPANET	Cross layer design
Biomedical communication	Data buses
Biomedical telemetry	Backplanes

	System-in-package
Plugs	Environmentally friendly manufacturing
Sockets	techniques
Diodes	Integrated circuit manufacture
Active matrix organic light emitting	Surface mount technology
diodes	Integrated circuit packaging
Diode lasers	Multichip modules
Light emitting diodes	Plastic integrated circuit packaging
Organic light emitting diodes	Semiconductor device packaging
P-i-n diodes	Thermal management of electronics
Schottky diodes	Electronic packaging thermal management
Semiconductor lasers	Electronics cooling
Superluminescent diodes	
Electrodes	Computational and artificial intelligence
Anodes	
Cathodes	Artificial intelligence
Microelectrodes	Affective computing
Fuses	Al accelerators
Inductors	Autonomous robots
Active inductors	Bio-inspired computing
Thick film inductors	Cognitive systems
Thin film inductors	Commonsense reasoning
Resistors	Context awareness
Memristors	Cooperative systems
Switched capacitor networks	Decision support systems
Varistors	Intelligent systems
Structural plates	Autonomous systems
Switches	Collective intelligence
Contactors	Hyper-intelligent systems
Microswitches	Intelligent automation
Optical switches	Intelligent robots
Transducers	Knowledge based systems
Acoustic transducers	Expert systems
Biomedical transducers	Mobile agents
Capacitive transducers	Knowledge engineering
Capacitive transducers	Inference mechanisms
Inductive transducers	
	Knowledge acquisition
Piezoelectric transducers	Knowledge discoveryKnowledge representation
Resistive transducers	
Ultrasonic transducer arrays	Learning (artificial intelligence)
Electronic equipment manufacture	Distance learning
Damascene integration	Naive Bayes methods
Micromachining	Nearest neighbor methods
Radiation hardening (electronics)	Learning systems
Semiconductor device manufacture	Backpropagation
Diffusion processes	Cognitive systems
Flip-chip devices	Electronic learning
High-k gate dielectrics	Hybrid learning
Physical unclonable function	Learning automata
Semiconductor device doping	Learning management systems
Semiconductor epitaxial layers	Self-supervised learning
Semiconductor growth	Semisupervised learning
Silicidation	Supervised learning
Wafer bonding	Unsupervised learning

Machine learning	Neural network hardware
Machine learning	Radial basis function networks
Adversarial machine learningBoosting	Recurrent neural networks

Deep learning	Hopfield neural networks
Dimensionality reduction	
Random forests	Computers and information processing
Reinforcement learning	
Relevance vector machines	Approximate computing
Representation learning	Computer applications
Robot learning	Application virtualization
Statistical learning	Edge computing
Transfer learning	Big Data applications
Prediction methods	Bot (Internet)
Linear predictive coding	Computer aided analysis
Predictive coding	Computer aided engineering
Predictive encoding	Computer aided instruction
Predictive models	Hybrid learning
Virtual artifact	Learning management systems
Autonomous mental development	Computer generated music
Computational intelligence	Computer integrated manufacturing
Computation theory	Control engineering computing
Computational complexity	Engineering computing
Concurrent computing	Green computing
Greedy algorithms	High energy physics instrumentation
Support vector machines	computing
Evolutionary computation	Linear particle accelerator
Evolutionary robotics	Knowledge management
Particle swarm optimization	Knowledge transfer
Fuzzy systems	Mathematics computing
Fuzzy control	Matlab
Fuzzy neural networks	Medical information systems
Hybrid intelligent systems	Electronic medical records
Genetic algorithms	Military computing
Logic	Mobile applications
Fuzzy logic	Physics computing
T uzzy logic	Power engineering computing
Multivalued logic	Power system analysis computing
Probabilistic logic	Publishing
Sufficient conditions	Bibliometrics

Motion detectionEthics		
	Motion detection	Ethics

Cyberethics	Schottky gate field effect transistors
Machine ethics	TFETs
Globalization	Thin film transistors
International relations	Heterojunction bipolar transistors
Peace technology	Double heterojunction bipolar transistors
Philosophical considerations	Millimeter wave transistors
Social factors	Phototransistors
Demography	Static induction transistors
Developing countries	
Technology social factors	Superconductivity
Privacy	
Sustainable development	Bean model
Technology	Critical current density
Appropriate technology	Flux pinning
Disruptive technologies	Superconducting devices
Machine ethics	Josephson junctions
Neurotechnology	SQUIDs
Technological innovation	Superconducting coils
Technology social factors	Superconducting magnets
Privacy	Superconducting microwave devices
Technology transfer	Superconducting photodetectors
Small business technology transfer	Superconducting films
Telepresence	Superconducting thin films
Telexistence	Superconducting integrated circuits
	Superconducting magnetic energy storage
Solid state circuits	Superconducting materials
	Granular superconductors
Circuit subsystems	High-temperature superconductors
Circuit theory	Yttrium barium copper oxide
FET circuits	Multifilamentary superconductors
FET integrated circuits	Niobium-tin
Field effect MMIC	Superconducting filaments
MESFET integrated circuits	Superconducting wires
JFET circuits	Multifilamentary superconductors
JFET integrated circuits	Type II superconductors
MESFET circuits	
MESFET integrated circuits	Superconducting transition temperature
MOSFET circuits	Superconductive tunneling
CMOSFET circuits	g
MOS integrated circuits	Systems engineering and theory
Power MOSFET	cyclemic originating and allocity
Gate leakage	Adaptive systems
Solid state circuit design	Adaptive control
Transistors	Cognitive radar
Field effect transistors	Line enhancers
CNTFETs	Multi-agent systems
Double-gate FETs	Collaborative intelligence
FeFETs	Variable structure systems
HEMTs	Capability engineering
JFETs	Complex systems
MESFETs	Configuration management
MISFETs	Hierarchical systems
MODFETs	Multilevel systems
MOSFET	Integrated design
MOSHETs	Interface management
OFETs	
UFE18	Military systems

Military control	Reduced order systems
Military robotics	Requirements engineering
Modeling	Technical requirements
Analytical models	Requirements management
Common Information Model (computing)	Service-oriented systems engineering
Atmospheric modeling	Solution design
Brain modeling	Stochastic systems
Building information management	System analysis and design
Computational modeling	
	Asymptotic stability
Agent-based modeling	Control system analysis
Computational cultural modeling	State-space methods
Computational materials science	Diakoptics
Reversible computing	Distributed processing
Context modeling	Dew computing
Data models	Edge computing
Data-driven modeling	Message passing
Metadata	Fault detection
Data-driven modeling	Fault tolerant systems
Deformable models	Interconnected systems
Digital elevation models	Botnet
Emulation	Large-scale systems
Graphical models	Lyapunov methods
Green's function methods	Open systems
Hidden Markov models	Open Access
Input variables	Open Educational Resources
Integrated circuit modeling	Physical layer
Cutoff frequency	Petri nets
Inverse problems	Physical design
Deconvolution	Robust control
Load modeling	Scalability
Metamodeling	
_	Scattering parameters
Numerical models	Sequential analysis
Object oriented modeling	Zero correlation zone
Power system modeling	Sequential diagnosis
Load modeling	Software prototyping
Process modeling	Static analysis
Semiconductor device modeling	System dynamics
Semiconductor process modeling	System performance
Signal representation	Cooperative caching
Simulation	System-level design
Computer simulation	Systems modeling
Digital simulation	Systems Modeling Language
Hardware-in-the-loop simulation	Task analysis
	Time factors
Human in the loop	
Medical simulation	Continuous time systems
Mixed reality	Discrete-time systems
Quantum simulation	Time invariant systems
Serious games	Time-varying systems
Systems simulation	System implementation
Solid modeling	System improvement
System identification	System integration
Systems modeling	System of systems
Multidimensional systems	Cyber-physical systems
Network systems	Digital twins
DC distribution systems	System realization
Physical design	System validation

System testing	Human intelligence
Model checking	Problem-solving
System verification	Control theory
System testing	Control nonlinearities
Model checking	Iterative learning control
Systems architecture	Observability
Deep architecture	Decision theory
Deep learning	Decision trees
Systems engineering education	TOPSIS
Systems operation	Econophysics
Systems simulation	Emergent phenomena
Systems support	Intelligent control
Systems thinking	Feedforward systems
Task analysis	Neurocontrollers
Technical management	Linear feedback control systems
Maintenance management	Frequency locked loops
Technical planning	Phase locked loops
g	State feedback
Systems, man, and cybernetics	Tracking loops
by stems, man, and cybernetics	Ergonomics
Behavioral sciences	
	Job design
Animal behavior	Smart spaces
Cognition	User experience
Activity recognition	Cyberbullying
Cognitive neuroscience	Human factors
Cognitive processes	Anthropomorphism
Commonsense reasoning	Human augmentation
Self-aware	Human image synthesis
Consumer behavior	Human intelligence
Neuromarketing	Digital intelligence
Psychiatry	Hyper-intelligence
Mental disorders	Mental health
Psychology	Technology acceptance model
Active perception	Identification of persons
Emotional responses	Biometrics (access control)
Industrial psychology	Face recognition
Mental health	Fingerprint recognition
Mood	Gait recognition
Neuropsychology	Iris recognition
Psychometric testing	Keystroke dynamics
Social intelligence	Palmprint recognition
Biological control systems	Face recognition
Biomarkers	Fingerprint recognition
Molecular biomarkers	Handwriting recognition
Computational linguistics	Forgery
Machine translation	Speaker recognition
Sentiment analysis	Speech recognition
•	Automatic speech recognition
Cybernetics	
Adaptive systems	Speech analysis
Adaptive control	Man-machine systems
Cognitive radar	Digital intelligence
Line enhancers	Extended reality
Multi-agent systems	Interactive systems
Variable structure systems	External stimuli
Cognitive informatics	Pervasive computing
Cognitive science	Ubiquitous computing

Context-aware services	
Wearable computers	Vehicular and wireless technologies
Smart glasses	· ·
Wearable Health Monitoring Systems	Automotive engineering
Posthuman	Automotive applications
Teleworking	Automotive control
Transhuman	Automotive electronics
User interfaces	Power steering
Audio user interfaces	Vehicle crash testing
Brain-computer interfaces	Vehicle detection
Data visualization	Vehicle driving
Graph drawing	Autonomous driving
Isosurfaces	
Emotion recognition	Vehicle dynamics Rollover
Exoskeletons	
	Vehicle safety
Graphical user interfaces	Advanced driver assistance systems
Avatars	Lane departure warning systems
Human computer interaction	Lane detection
Affective computing	Land mobile radio equipment
Chatbots	Mobile antennas
Extended reality	Navigation
Gaze tracking	Aircraft navigation
Head-mounted displays	Course correction
Head-up displays	Dead reckoning
Human in the loop	Indoor navigation
Immersive experience	Inertial navigation
Telepresence	Marine navigation
Telexistence	Radio navigation
Human-robot interaction	Satellite navigation systems
Social robots	Global navigation satellite system
Human-vehicle systems	Global Positioning System
Smart cards	Satellite constellations
	Sonar navigation
Ultrasonics, ferroelectrics, and frequency	Propulsion
control	Aerospace propulsion
	Aircraft propulsion
Ferroelectric materials	Propellers
Ferroelectric films	Electromagnetic launching
Relaxor ferroelectrics	Coilguns
Frequency control	Railguns
Automatic frequency control	Electrothermal launching
Tunable circuits and devices	Rockets
RLC circuits	Vehicles
Tuned circuits	Connected vehicles
Tuning	Hydrogen powered vehicles
Laser tuning	Hypersonic vehicles
Optical tuning	Intelligent vehicles
Tuners	Autonomous vehicles
Piezoelectricity	Vehicle-to-everything
Piezoelectric ffect	Internet of Vehicles
Piezoelectric polarization	Land vehicles
Pyroelectricity	Bicycles
Ultrasonic imaging	Electric vehicles
Ultrasonography	Road vehicles
Sonogram	Military vehicles
Ultrasonic transducers	Remotely guided vehicles
o ia door no a drioddooro	torrotory garada vornolos

Drones
Remotely guided underwater vehicles
Remotely piloted aircraft
Space vehicles
Space shuttles
Wireless sensor networks
Body sensor networks
Event detection
